

# MIXING GASES EFFECTIVELY WITH GCE CYLINDER VALVES

GCE Group deliver the best innovative solutions for welding and beverage gases

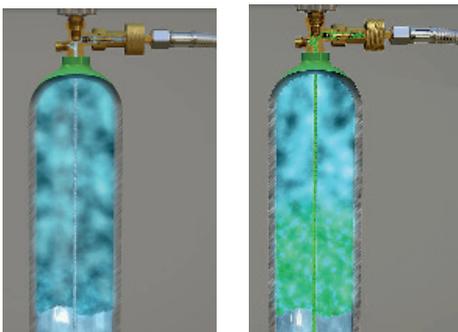

## GCE CYLINDER VALVES WITH DIP TUBES

GCE cylinder dip tubes ensure complete gas mixing is achieved during the filling process. They can also be used to enable the user to withdraw liquid from the bottom of a cylinder containing a liquefied gas.

- Complete mixing of mixed gases for welding or beverage dispense
- Suitable for all cylinder sizes

Homogeneous mixing achieved during filling

Liquid CO<sub>2</sub> → Gaseous Argon
