CYLINDER VALVES

GCE Group has a long and illustrious history in manufacturing and delivering safe, dependable valves, of which we are extremely proud. All the products we supply are backed by our lifetime support service and 2 year warranty.

All GCE Group valves are manufactured and independently tested in accordance with EN ISO standards by globally recognised Notified Bodies to assure you of robust, reliable service.

GCE Group cylinder valves are manufactured in an ISO 9001 accredited, dedicated facility in the Czech Republic, with a proud 100-year long tradition of gas equipment manufacture.

All valves are manufactured, tested and assured in accordance with EU directive and are π marked accordingly.

Each valve is then individually pressure tested as part of strict production monitoring.

GUIDING PRINCIPLES

GCE Group implements a Continuous Improvement Programme to ensure that we will continue to provide you with world-beating quality products in accordance with our core values of Safety, Quality and Innovation.

SAFETY

The safe operation of our products in your hands is our paramount priority.

QUALITY

Our rigorous focus on Quality begins with exacting supplier and component selection and audit, through exceptional manufacturing process execution, using skilled and proficient people, in outstanding facilities, concluding in meticulous and rigorous testing.

INNOVATION

We actively encourage our whole organisation to identify business needs for development, and continuously look for ways to provide new solutions.

SIMPLY SAFE

MEDICAL VALVES

GCE Group offers a complete range of valves for the supply and control of medical gases with a portfolio of standard, RPV and VIPR valves incorporating both pressure reduction and precise flow selection.

GCE Group valves with integrated pressure regulator provide complete and accurate gas control to deliver Medical gases either to downstream devices such as ventilator/ anaesthesia apparatus, or directly to the patient, including the most stringent flow and pressure levels demanded in paediatric and neo-natal care.

Approved for Working Pressures of 300 bar with a service life up to 15 years, GCE Group MediVital valves are available with interchangeable fill ports and gauges to provide future-proof medical gas packages enabling response to unforeseen changes in market demand.

GCE Group medical valves are supplied globally for dependable service in hospitals, ambulances, paramedic emergency kits and respiratory homecare, providing medical oxygen and other prescribed gases reliably and conveniently at the point of need.

INDUSTRIAL VALVES

GCE Group cylinder valves are designed to withstand the most demanding industrial environments.

Globally approved High pressure Industrial valves including valves with integrated pressure regulator which deliver point-of-use pressures and dial-up flows from 300 bar cylinder sources are available with up to 15 years service life. Dedicated EN 561 outlet connections ensure only the correct gas is connected for use.

Valves designed to control and safely deliver all industrial gases are available with features such as residual pressure devices (RPV), active and non-active contents gauges and a variety of fill port connections.

Ergonomically designed and globally approved protection guards, rated for impact tests over 100 kg, high flow, multi-cylinder pack valves and line valves complete the range.

INNOVATION AND CONTINUOUS IMPROVEMENT

GCE Group are committed to bringing the best innovative solutions to Industrial and Medical valve markets.

To deliver this we excel at Continuous Design Improvement implementation, and are a recognized innovator in the field providing solutions for the following.

- › Integrated valves
- › Electronic gauges
- › Future proof connectivity
- › Aggressive gases
- › Exacting specifications
- › Demanding environments
- › Bespoke forging
- › Advanced materials

MAINTENANCE AND REPAIR

After sales support from GCE Group is second to none.

In addition to providing a full repair and refurbishment service, GCE Group offer onsite service, repair and maintenance training, authorising approved personnel to perform work on valves in the field, reducing out-of-service time.

GCE Group integrate ease-of-maintenance and ease-of-repair considerations into initial valve designs to create designed-in ownership simplicity.

For maintenance and repair support, please contact your regional offices with details shown on the back cover of this brochure.

SIMPLY SAFE

INNOVATION AND CONTINUOUS IMPROVEMENT

GCE Group cylinder valves are available with a wide array of customer-use and fill-port connections, either to National Standard designations or created to a bespoke proprietary connection.

Valves with integrated pressure regulator are provided with National Standard outlets, compliant with required gas designations.
