

## EMERGENCY EQUIPMENT **OXYGEN CYLINDERS**

EDITION 1/2013

### PORTAFLOW

The GCE Sabre Medical range of Portaflow, portable medical oxygen delivery systems include products that are equally suited for immediate care or mobile oxygen therapy.

The range includes a cylinder, regulator and oxygen therapy mask. A feature of the Portaflow is that the regulator is permanently married to the cylinder, providing a user friendly, robust and low profile unit when compared with separate cylinder and regulator options.

The regulator incorporates a non-return charging port and can either be refilled by reputable medical oxygen providers or, for domiciliary and emergency use by decanting from larger cylinders. Includes rucksack bag.

### OXYGEN CYLINDERS

Aluminium oxygen cylinders with pin index valves. Can be supplied charged to 200 bar or empty for export.
